(High Plains Air Gun Metallic Silhouette)
(Jim Fields-Rules Committee Chairman)

Introduction

First off, welcome to the Oklahoma City Gun Club, our club covers 600 acres, with a membership of 2,400. We have over 23 divisions from skeet & trap, Cowboy Action to our Handgun Metallic Silhouette division to name a few. Our silhouette range covers approximately 45-50 acres, our firing line is 402 feet long & 24 feet wide. Our wireless pneumatic target system raises targets from 25 yards to 500 meters in approximately 60 seconds. We have hosted hundreds of State, Regional & one National Championship, & eight World Championships. I've been the Handgun Silhouette match director for the past 40 years, stepping down the first of this year, but still active, just not as many responsibilities.

Our club is located approximately 23 miles NE of downtown Oklahoma City & 4 miles north of Arcadia, OK. GPs info- 12465 NE 234th, Arcadia, OK – 73007. We have 20 RV hook-ups with water, within 50 yards of the firing line. Edmond, OK, with motels & a wide variety of restaurants are only 20 minutes away from our main entrance. Our web address – okcgunclub.org GPS info 12465 NE 234th, Arcadia, OK- 73007-Sorghum Mill, 234th St. the same.

We started shooting AIR handgun competition in 2003, which is a part of our handgun silhouette competition, our large indoor AIR range is one of the best ranges anywhere.

We have bench rest AIR competition as well as Field Target matches. So, AIR competition is not new to our club members, however these big bore AIR rifles are a whole new ball game. So, we can all experience this new sport together. As far as I know, this may be a first in big bore AIR silhouette competition in the country. Bring a friend or relative with binoculars or spotting scope to spot your hits & misses.

The big bore rifles & small-bore rifles will compete on our outdoor silhouette range, eventually these matches will be on a monthly basis, March through November. Targets for big bore & small-bore will be steel, silhouette shaped chickens, pigs, turkeys & rams at different distances. Later down the road, maybe next year we possibly will add a state & a regional championship. Be sure to check out the **500 Meter Ram Slammer Event** under the Big bore rules. Make sure, if possible to have solid sight settings & supply tanks are topped off.

These matches will be a lot of fun for young & old, men, women, kids & grandkids & have the potential to grow into something **REALLY SPECIAL**.

Our rule book on the following pages should explain all you need to know about this fantastic new sport of AIR rifle silhouette competition. So have fun & respect the competitor shooting next to you.

Any questions, contact one of our match directors listed under the directory page, we will be glad to help.

Big Bore Air Gun Metallic Silhouette Rules

1. All supply tanks must be **secured on the concrete firing line**. Tethering is permitted.
2. Big Bore Rifles, .30 caliber & larger to be fired on big bore targets. This is a 40-round match, shot in this order: (10 rams, 200 meters) (10 turkeys, 150 meters) (10 pigs, 100 meters) & (10 chickens 50 meters) **Please Note:** The chickens at 50 meters, your last 10 targets, are to be shot in the standing position. All other targets are shot sitting or prone. You are allowed up to 10 sighter shots before you shoot for score. Targets are shot in groups of 5, shot left to right. If a target is shot out of order, you lose 2 targets. If you bring both a Big Bore & a Small Bore rifle to the match, you may compete in both categories, Big Bore & Small Bore. (Providing you have AIR for both)
3. All targets must fall to be counted for score except rams, ram hits can be counted for score, so long as the hit is in the kill zone, in other words, any hit from the belly line up; leg hits do not count unless target goes down.
4. Rifles may be fired from the prone position with a bipod or sand bag in front, sand bags are not allowed in the rear. Cross-sticks, not attached to rifle will also be allowed for the competitors that want to shoot in the sitting position.

Basically, any safe shooting position will be allowed including standing. **Note:** This rule also applies to the Small Bore competitors as well.

5. **Heavier bullets** are recommended for the .308's & .45 calibers. FX no limit rings, or 30 to 40 degree tilt bases are also recommend so as not to run out of elevation on scope adjustments, especially on big bore targets. (If possible, attend match with solid sight settings (to avoid running low on AIR for the 40-round match)
6. This will be a 40-round match, & as stated above, (10 rams-200 meters) (10 turkeys-150 meters) (10 pigs-100 meters) & (10 chickens-50 meters) You will have 30 seconds to load & 3 minutes to fire on five targets, then you will hear a cease fire at the end of the 3 minutes over the PA system, clear your rifles, make the line safe. Spotters with spotting scopes are allowed to aid all shooters & to keep score on hits & misses & transport fill tanks to the next shooting position. **Note:** There is no limit on optics power. Red dot sights are also allowed. Always respect the person shooting next to you.
7. Rifles must be pointed straight up or down range while on firing line, NEVER side-ways. You must not touch rifles while target painters are down range. Eye & ear protection are necessary. Ear plugs OK. Some big bore air rifles that are not modulated are quite loud.

8. You will be given ample time to refill your rifle air tanks between strings of fire & relays.
9. **Shoot-offs to break tie scores** - Will be five (5) full size BB chickens at 200 meters on the very east end of the 200 meter berm. Winner to be decided by which competitor downs the most chickens. If you shoot a perfect 40x40 score, alert a line officer for instructions.
10. **Re-entry:** After competitor completes course of fire, (& you have any air left) he or she may shoot a re-entry, however it will not count for score for the match.
11. **500 Meter Ram Slammer Event** - After completion of competitors 40 round match or matches, you may sign up to compete in this special event. Competitor will be allowed to shoot off bench provided. You will be allowed up to 12 shots to register a hit on the 500-meter ram, to be verified by your spotter & a line officer. Ram does not have to fall; however, leg hit does not count. Winner to receive 2 free entries at his or her next match (one time deal) & photo definitely will be taken with the ram!! 500 meters is 547 yards. The 1st competitor to accomplish this feat will be recognized as the World Record Holder for this event. (An extra supply tank is recommended for this event, & can be tethered)

High Plains

(HPAGMS)

Small Bore Air Gun Metallic Silhouette

Rules

1. Smallbore Air rifles .22, .25 & .257 calibers are to be fired on the smallbore targets in this order, starting on west end of firing line. (10 rams, 100 yards), (10 turkeys, 75 yards) (10 pigs, 50 yards) & (10 chickens, 25 yards) **Note:** On your last ten targets, 10 chickens at 25 yards, will be shot in the standing position. All other targets are shot in the sitting or freestyle position.
2. **This will be a 40 round match:** Targets are shot in groups of five, shot left to right. If you shoot out of order, you lose 2 targets, either BB or SB. You are allowed up to 10 sighter shots on swingers on the west end of the firing line before you shoot for score. Classes are as follows-AA-0-36-AAA-37-39-International-40x40. Your first score determines what class you start in. You have to shoot 2 scores with-in a 12-month period in the next class to move up. Jump 2 classes, example, jump from AA to International you immediately go to that class at the next match. Same for big bore.
3. All targets must fall to be counted for score except rams, ram hits can be counted so long as the hit is in the kill zone. In other words, any hit from the belly line up, may be counted as a hit; leg hits do not count unless ram falls.
4. All safety rules stated above for big bore apply to small-bore shooters as well. Always respect the competitor shooting next to you.
5. Rifles may be fired from the prone position with a bipod or sand bag in front; rear sand bags are not permitted. Sitting position with sticks, no problem. (Basically, any safe shooting position is allowed) **Note:** Your last ten targets, chickens at 25 yards are to be shot in the standing position. There is no limit on optics power. Red dot sights are also allowed in both big bore as well as Small Bore.
6. You will have 30 seconds to load & 3 minutes to fire on ten targets, then you will hear a cease fire command at the end of the 3 minutes over the PA system, clear your rifles, make the line safe. Spotters with spotting scopes are allowed to aid shooters & to keep score on hits & misses & transport supply tanks to the next shooting position.

7. Rifles must be pointed straight up or down range while on firing line. NEVER side-ways! Do not touch rifles while target painters are down range. Eye & ear protection are necessary. Some big bore air rifles that are not modulated are quite loud. This rule applies for big bore guns as well.
8. You will be given ample time to fill rifle air tanks between strings of fire & relays.
9. Shoot-offs to break tie scores will be five (5) fifth-scale chickens at 100 yards. Winner to be decided by which competitor downs the most chickens. If you shoot a perfect 40x40 score, contact a line officer for instructions.
10. All rifles may be modified, (BB & SB) therefore are considered unlimited guns. There is no weight limit, however no weights of any kind may be added or attached to the rifles to gain an advantage. This rule is for both BB & SB.
11. Handicap Shooters: Those shooters with physical disabilities that cannot shoot in the prone position, with help from a fellow competitor or line officer, may shoot on one of the benches provided for that purpose. This

has to be approved by one of our match directors.

12. OKC Gun Club provides shooting mats or you may bring your own.

OKC Gun Club silhouette division also provides a \$5.00 noon meal & has over 20 RV hook-ups, including water within 50 yards of the firing line.

Our targets are operated by a wireless pneumatic system that re-sets over 4,000 lbs. of targets from 25 yards to 500 meters, in less than 60 seconds. There is no other wireless system like this on Planet Earth.

This match is designed for one thing, to have FUN knocking down steel targets & promoting the fantastic sport of AIR gun competition & hunting.

Any questions - Contact Match Directors - Jim Fields, 405-203-1268,

Steve Gerot, 816-351-0573 or Jim Meyers, 405-317-0151. OKC Gun Club web address – okcgunclub.org

Scores will be posted on our web-site within 24 hours of the match.
