

Silhouette Range Closure

While clearing trees for the new Benchrest range we have discovered the existing benchrest range is now plainly visible from the firing line on the silhouette range. Because we place the safety of our members and the public above all else, we have decided to close the silhouette range until a protective berm can be constructed along the west edge of the benchrest range. This closure will be in effect EVERYDAY until the new berm is completed. The calendar had been updated to reflect the Silhouette range as closed until the end of February. Please know that we do not close ranges unnecessarily and we will be making every effort to get all ranges open as soon as we can do so safely.

The existing benchrest will remain OPEN on weekends.

During the construction please **DO NOT INTERRUPT THE CONTRACTOR** and absolutely do not exit your vehicle while equipment is being operated. The operator does not have good visibility while working in the equipment and a person walking in the work area can be extremely dangerous.

Progress on the new benchrest range is proceeding very well. The new range will have targets at 50, 100, and 150 yards with one target at 25 yards for scope alignment purposes. We are still working to determine the number of shooting positions, but we hope to have about half as many as the old range. We are hoping a 50% increase in shooting positions can help alleviate some of the congestion we see on the benchrest range and especially on weekends.

If you have any questions, please reach us at Projects@OKCGunclub.org
